GENERAL INFORMATION

GENERAL INFORMATION

1. Purpose and Scope

This Federal Item Identification Guide (FIIG) is a self-contained document for the collection, coding, transmittal, and retrieval of item characteristics and related supply management data for an item of supply for logistical use. This FIIG is to be used to describe items of supply identified by the index of approved item names appearing in this section.

2. Contents

This FIIG is comprised of the following:

- Index of Approved Item Names Covered by this FIIG
- Applicability Key Index
- Section I - Item Characteristics Data Requirements
- Section III - New text that should be here.
- Appendix A - Reply Tables
- Appendix B - Reference Drawing Groups (as applicable)
- Appendix C - Technical Data Tables (as applicable)

a. Index of Approved Item Names Covered by this FIIG:

The index lists the approved item names with definitions and item name codes as they appear in Cataloging Handbook H6, applicable to this FIIG. In addition, each name entry is assigned an applicability key for use in relating the characteristics requirements in Section I to the specific item name.

b. Applicability Key Index:

The purpose of this index is to provide the user with a ready reference for determining the specific requirements which are applicable to a given approved item name. This index lists all requirements in sequence as they appear in the FIIG. The applicability of a Master Requirement Coded requirement is indicated by the column headed by the specific item name applicability key as follows:

(1) The letter "X" indicates the requirement must be answered for a full descriptive item.

(2) The letters "AR" indicate the requirement is to be answered as required by (1) instructional notes within the FIIG; (2) when the reply is predicated on replies to a related main requirement; or (3) when an asterisk (*) is used in conjunction with the applicability key column in Section I.

(3) A blank in the column indicates the requirement is not applicable to the specific item name.

GENERAL INFORMATION

c. Section I - Item Characteristics Data Requirements:

This section contains the physical and performance characteristics requirements needed to describe and identify an item of supply. These characteristics differentiate one item from all other items of supply and are to be used to meet the needs of all supported functions. This section is arranged in columns. Identification of each column and instructions pertinent thereto are as follows:

(1) Applicability Key:

The first column shows the applicability key(s) for each requirement. It indicates whether the requirement need be satisfied for the item being identified. "ALL" indicates that the requirement must be answered for all items covered by the FIIG. One or more alphabetic character(s) or group of one or more alphabetic characters indicates a response is required when describing items with an approved item name or names represented by the key(s). An asterisk (*) used in conjunction with any applicability key indicates that the characteristic stated in the requirement may not be applicable to all items covered by the FIIG.

(2) Master Requirement Codes (MRC):

A four-position code which is assigned to a FIIG requirement for identification of the requirement, cross-referencing requirements in the various sections and appendices of the FIIG, and for mechanized processing and retrieval of FIIG generated data. Absence of a MRC for a requirement indicates a lead-in to requirements with individual MRCs in Appendix B.

(a) The coding technique for providing MULTIPLE/OPTIONAL responses will not be used for a Section I requirement assigned Mode Code A or L that leads to Appendix B sketches with dimensional requirements.

(b) Identified Secondary Address Coding:

This technique is for extending the Master Requirement Code so that a unique address is provided for each application of the requirement in relation to the item and is authorized only as instructed within the requirement. Responses coded through this technique will always consist of the following: (1) Master Requirement Codes, (2) indicator code (a single numeric character determined by the number of positions contained), (3) identified secondary address code (1 to 3-digit alphabetic codes determined by the number of predicted replies), (4) the mode code, (5) the reply code and/or clear text response, and (6) end with a record separator (*). Steps (1) through (6) are repeated for each application of the requirement.

(c) AND/OR coding:

A technique for extending the Master Requirement Code to provide a distinctive address for multiple responses to the same requirement. Responses coded through this technique will always consist of (1) Master Requirement Code, (2) mode code, (3) the response or reply code (as instructed by the requirement), (4) a single dollar sign (\$) for an OR condition, or a double dollar sign (\$\$) for an AND condition, (5) the mode code, (6) the response or reply code

GENERAL INFORMATION

(followed by conditions (4) through (6) for each of the multiple responses) and (7) end with a record separator (*). NOTE: Apply this technique only when instructed by the requirement sample reply (e.g.).

(3) Mode Code:

A one-position alphabetic code that specifies the manner in which a response will be prepared. Each requirement assigned a MRC is also assigned a mode code. Sample replies follow each FIIG requirement displaying the proper construction of a response for the assigned mode code. The response to a requirement will always be prepared in accordance with the assigned mode code and sample reply except in the following instances:

(a) Use of E Mode Code replies is not authorized. If a reply needed to describe an item is not listed in the applicable table, contact the FIIG Initiator.

(b) Mode Code K may not be used for any requirement unless instructed by the requirement instructions.

(4) Requirement:

This portion includes the characteristics data elements and data use identifiers required to identify and differentiate one item of supply from another, narrative definitions, and explanations as to use and method of expression. Instructions for coding and preparing replies are also provided.

(5) Reply Code:

A code that represents an established authorized reply to a requirement.

d. Section III - Supplementary Technical and Supply Management Data:

This section includes those characteristics requirements necessary to support specific logistics functions other than National Stock Number assignment.

e. Appendix A - Reply Tables:

Tables of authorized replies to requirements and reply codes when the tables are too lengthy for inclusion in Section I/III, when applicable.

f. Appendix B - Reference Drawings:

This appendix contains representative illustrations which portray specific variations of one or more generic characteristics. If reference drawings contain requirements pages to be used in conjunction with illustrations for dimensioning purposes, the requirements pages will contain Master Requirement Codes, mode codes, and a statement of the requirement. A response to requirements on a requirements page is necessary only for those Master Requirement Codes applicable to the illustration selected.

g. Appendix C - Technical Data Tables:

GENERAL INFORMATION

This appendix contains conversion charts and similar data pertinent to the requirements in Section I/III, when applicable.

3. Enter administrative MRC CLQL immediately following the last FIIG requirement reply, as instructed below:

<u>MRC</u>	<u>Mode Code</u>	<u>Requirement</u>	<u>Example</u>
CLQL	G	COLLOQUIAL NAME (common usage name by which an item is known)	CLQLGWOVEN WIRE CLOTH*

4. Special Instructions and Indicator Definitions

a. Measurements:

Unless otherwise indicated within a requirement example, enter all measurements in decimal form, carried to the nearest three decimal places, with a minimum of one digit preceding the decimal. For SI (metric), enter all measurements with a minimum of one digit before and after the decimal. For fraction to decimal conversion, see Appendix C.

b. Indicators:

A cross hatch (#) following an AIN, MRC, Reply Code or Drawing Number indicates for "ALL EXCEPT USA" use only.

5. Indexes

a. Index of Data Requirements

This index is arranged in alphabetic sequence by Master Requirement Code, cross-referenced to the applicable data requirement and page number(s).

b. Index of Approved Item Names

This index is arranged in alphabetic sequence referenced to Applicability Key.

c. Applicability Key Index

This index is arranged in Applicability Key Sequence.

6. Maintenance

Requests for revisions and other changes will be directed to:

GENERAL INFORMATION

INDEX OF APPROVED ITEM NAMES COVERED BY THIS FIIG

<u>Approved Item Name</u>	<u>INC</u>	<u>App Key</u>
BASIN, WASH	13027	FA
A container having gently sloping curved sides and a diameter greater than its depth.		
BASKET, FRAME MOUNTED	27040	BA
A cloth basket supported by a rigid frame mounted on casters, wheels, or skids. It is designed for use in hospitals, laundry, postal operations, and other similar functions. For basket only, see BASKET, CLOTH. For frame only, see FRAME, CLOTH BASKET.		
CAN, FLAMMABLE WASTE	19260	JA
A fire-resistant, liquid-tight container fitted with a practically airtight cover. This item is specifically designed to provide safe temporary storage within buildings for oily waste, rags, or similar flammable materials.		
CAN, FOODSTUFFS #	40528	JA
A rigid or flexible item designed for transportation and/or storage of liquid foodstuffs. Filling/pouring opening or faucet may be included.		
CAN, LUBRICANT-LIQUID FUEL, COLLAPSIBLE	51388	JA
A container made of a collapsible material like an elastomer fabric. It is designed for storage and transportation of liquid fuels and lubricants. It may have a common filling and pouring opening. Excludes CAN, MILITARY and CAN, LUBRICANT-LIQUID FUEL, NONMETALLIC.		
CAN, PHOTOGRAPHIC FILM STORAGE	05831	AA
CAN, TRASH AND GARBAGE	66612	AA
A metallic or plastic item generally cylindrical, the top diameter is greater than the bottom diameter. It is normally reinforced and if metallic has a surface treatment. It may have handles and is free standing with a removable cover. It may be used for temporary inside disposal but it is generally used for outside disposal. Excludes WASTE RECEPTACLE.		
CAN, UTILITY	15588	JA
An item designed for storage or transportation of various liquids, so constructed as to have separate filling and pouring openings.		
COVER, CAN, TRASH AND GARBAGE	66790	AA
CROCK, EARTHENWARE	03984	EA

GENERAL INFORMATION

<u>Approved Item Name</u>	<u>INC</u>	<u>App Key</u>
FUNNEL	05676	GA
A hollow conical shaped utensil with a small hole at the apex or a narrow tube of variable lengths preceeding the apex, used to channel substances into a container. It may include a strainer which may or may not be removable. Excludes FUNNEL, FILTERING, LABORATORY.		
HANDCART, GROCERY	07111	CA
A small hand-propelled vehicle consisting of a metal frame mounted on 3 or 4 wheels with 1 or 2 self-contained wire baskets and/or with a shelf or shelves for 1 or 2 removable wire baskets. It is used by the consumer in self-service establishments to assemble food and small household items and convey purchases to checker's stand.		
HANDCART, MAIL	30547	CA
A small hand-propelled vehicle consisting of a metal frame mounted on three or more wheels, casters, or combination thereof, with shelf(ves) designed to accommodate removable wire baskets. It is used in mail room operations for the assemblage and distribution of mail. Excludes HANDCART, GROCERY.		
LINER, BASKET	27042	BB
A container of flexible material designed to cover the inner surface of a basket. Excludes BASKET, CLOTH and BAG (as modified).		
PAIL, COLLAPSIBLE	32488	DA
A bucket made of flexible waterproof material. It has a carrying handle and may have hinged supports on each side which, when closed, collapse the pail. It may also have metal rings at the top and bottom which may be hinged to permit folding the pail in half when in the collapsed position.		
PAIL, FIRE FIGHTING #	58573	DA
A cylindrically or truncated cone shaped container having a bail. It is designed to hold sand or water for extinguishing fires. The bottom is formed hemispherically or approximately so to discourage use for other purposes. Excludes PAIL, UTILITY and PAIL, COLLAPSIBLE.		
PAIL, UTILITY	29273	DA
A container of different shape configurations having a bail, and may or may not have a lid. Capacity is usually rated in quarts or liters, and ranges from 1 to 20 quarts or 5 to 75 liters. It is designed to accommodate dry, liquid, or semiliquid materials.		
POUCH, URINE COLLECTION, AIRCRAFT PILOT	42247	AD
A device installed on, but not permanently fixed to, an aircraft crew station. It is designed to be used by pilots during flight for urinary relief. It may contain a bag or a pad for urine collection and absorption.		

GENERAL INFORMATION

<u>Approved Item Name</u>	<u>INC</u>	<u>App Key</u>
RECEPTACLE, LIQUID WASTE	38787	AC

A disposable or reusable container made of any suitable material. It may include an insert which is easily removed from the main unit to discard contents. It is designed to be used in aircraft and the like in conjunction with the lavatory, latrine, or galley sink for temporary disposal of liquid.

SAFETY CAN	15589	HA
------------	-------	----

A cylindrical metal container intended for temporary storage or handling of flammable liquids such as gasoline, naphtha, benzene inside of buildings that are not provided with special storage rooms of proper construction, and for transport of such liquids for filling and supply purposes within local outside areas (excludes bench type safety cans).

SHOWER PAIL, COLLAPSIBLE	29914	DA
--------------------------	-------	----

A receptacle made of waterproof material, cylindrical or almost cylindrical in shape for catching, holding or carrying liquids. It has a handle for carrying or suspending and is specifically designed to accommodate a shower head assembly.

WASTE RECEPTACLE	40135	AB
------------------	-------	----

A container of different configurations, with a body of seamless construction. May be provided with a pail or liner insert. It contains waste or recyclables until collection or disposal. Excludes CAN, TRASH AND GARBAGE and DISPOSAL CONTAINER (as modified).

WASTE RECEPTACLE, REMOVABLE OPEN TOP TYPE #	19463	AC
--	-------	----

A metallic or nonmetallic item with a body of seamless construction, generally used with a metallic or nonmetallic pail insert. It is used for temporary inside disposal of waste materials. See also WASTE, RECEPTACLE, STEP-ON TYPE.

WASTE RECEPTACLE, STEP-ON TYPE #	19464	AC
----------------------------------	-------	----

A metallic or nonmetallic item, which may be crevice free, with a body of seamless construction, generally used with a metallic or nonmetallic pail insert. It is used for temporary inside disposal of waste materials. See also WASTE RECEPTACLE, REMOVABLE OPEN TOP TYPE.

WASTE RECEPTACLE, SWINGING DOOR #	07485	AB
--------------------------------------	-------	----

A metallic or nonmetallic item designed for inside or outside use to receive waste paper and other litter. Excludes CAN, ASH AND GARBAGE.

Reply Instructions: Enter the applicable Reply Code from the table below, followed by the Commercial and Government Entity (CAGE) Code of the entity controlling the document, a dash, and the document designator. The agency that controls the limited coordination document must be preceded and followed by a slash following the designator. The word canceled or superseded must be preceded and followed by a slash for the designator. Professional and industrial association specifications/standards are differentiated from a manufacturer's specification in that the data has been coordinated and published by the professional and industrial association. Include amendments and revisions where applicable.

ALL*

ZZZW	G	DEPARTURE FROM CITED DOCUMENT
------	---	-------------------------------

Definition: THE TECHNICAL DIFFERENTIATING CHARACTERISTIC(S) OF AN ITEM OF SUPPLY WHICH DEPART(S) FROM THE TEXT OF A SPECIFICATION OR A STANDARD IN THAT IT REPRESENTS A SELECTION OF CHARACTERISTICS STATED IN THE SPECIFICATION OR STANDARD AS BEING OPTIONAL, OR A VARIATION FROM ONE OR MORE OF THE STATED CHARACTERISTICS, OR AN ADDITIONAL CHARACTERISTIC NOT STATED IN THE SPECIFICATION OR STANDARD.

Reply Instructions: Enter the reply in clear text. (e.g., ZZZWGAS MODIFIED BY MATERIAL*)

ALL*

ZZZX	G	DEPARTURE FROM CITED DESIGNATOR
------	---	---------------------------------

Definition: THE VARIATION WHEN THE ITEM IS IN CONFORMITY WITH A TYPE DESIGNATOR COVERED BY A SPECIFICATION OR STANDARD, EXCEPT IN REGARD TO ONE OR MORE TECHNICAL DIFFERENTIATING CHARACTERISTICS.

Reply Instructions: Enter the reply in clear text. (e.g., ZZZXGAS MODIFIED BY MATERIAL*)

ALL*

ZZZY	G	REFERENCE NUMBER DIFFERENTIATING CHARACTERISTICS
------	---	--

Definition: A FEATURE OF THE ITEM OF SUPPLY WHICH MUST BE SPECIFICALLY RECORDED WHEN THE REFERENCE NUMBER COVERS A RANGE OF ITEMS.

Reply Instructions: Enter the reply in clear text. (e.g., ZZZYGCOLOR CODED LEADS*; ZZZYGAS DIFFERENTIATED BY MATERIAL*)

ALL*

CRTL	A	CRITICALITY CODE JUSTIFICATION
------	---	--------------------------------

FIIG T
Section Parts

APP Key	MRC	Mode Code	Requirements
------------	-----	--------------	--------------

Definition: THE MASTER REQUIREMENT CODES OF THOSE REQUIREMENTS WHICH ARE TECHNICALLY CRITICAL BY REASON OF TOLERANCE, FIT, PERFORMANCE, OR OTHER CHARACTERISTICS WHICH AFFECT IDENTIFICATION OF THE ITEM.

Reply Instructions: Enter the Master Requirement Code for the requirement, the reply to which renders the item as being critical. (e.g., CRTLAMATL*; CRTLAMATL\$\$ASURF*)

Reply to this requirement only if the header record for the item identification for the item being identified has been coded as critical.

NOTE FOR MRC PRPY: IF DOCUMENT AVAILABILITY CODE B, D, F, OR H, REPLY TO MRC PRPY.

ALL* (See Note Above)

PRPY A PROPRIETARY CHARACTERISTICS

Definition: IDENTIFICATION OF THOSE CHARACTERISTICS INCLUDED IN THE DESCRIPTION FOR WHICH A NON-GOVERNMENT ACTIVITY HAS IDENTIFIED ALL OR SELECTED CHARACTERISTICS OF THE ITEM AS BEING PROPRIETARY AND THEREFORE RESTRICTED FROM RELEASE OUTSIDE THE GOVERNMENT WITHOUT PRIOR PERMISSION OF THE ORIGINATOR OF THE DATA.

Reply Instructions: Enter the MRC codes of the individual characteristics of the description which are marked proprietary on the technical data, using AND coding (\$\$) for multiple characteristics. If all the MRCs are proprietary, enter the reply PACS. If none of the MRCs is proprietary, enter the reply NPAC. (e.g., PRPYAPACS*; PRPYANPAC*; PRPYAMATL\$\$ASURF*)

ALL*

ELRN G EXTRA LONG REFERENCE NUMBER

Definition: A REFERENCE NUMBER EXCEEDING 32 POSITIONS.

Reply Instructions: Enter the entire reference number. Do not include the 5-position Commercial and Government Entity (CAGE) Code unless there is more than one extra long reference number on the NSN, (e.g., ELRNGANN112036BIL060557LEN313605UZ62365*).

FIIG T
Section Parts

APP Key	MRC	Mode Code	Requirements
------------	-----	--------------	--------------

If there is more than one extra long reference number on the NSN, include the CAGE or NCAGE and separate each reference by using the "&" character, (e.g., 28480 ANN112036BIL060557LEN313605UZ62365 & S1234 NN112036BIL060557LEN313605UZ62365).

In determining quantity of characters in the reference number, count will be made after modification in accordance with Volume 2, Chapter 9, FLIS Procedures Manual, DoD 4100.39-M.

ALL*

ELCD	D	EXTRA LONG CHARACTERISTIC DESCRIPTION
------	---	---------------------------------------

Definition: A DESCRIPTION THAT EXCEEDS 5000 CHARACTERS.

Reply Instructions: Enter the Reply Code from the table below. (e.g., ELCDDA*)
